Word Count: X,XXX

Abstract

Everyone agrees that this issue is really important. But we do not know much about this specific question, although it matters a great deal, for these reasons. We approach the problem from this perspective. Our research design focuses on these cases and relies on these data, which we analyze using this method. Results show what we have learned about the question. They have these broader implications. **h/t:** Prof. Fabrizio Gilardi

Table C1: Coding Scheme

Label	Definition	Examples
<i>pro</i>	Post contains a boycott appeal. As such all posts expressing a pro-boycott stance are included, e.g., calls to action, promotion, support, or justification	“Don’t buy Israeli products.” “BDS is a peaceful way to end apartheid.” “BDS.” “We must boycott until human rights are respected.”
<i>anti</i>	Explicit or implicit rejection of Israel boycotts, or BDS as a movement or tactic.	“BDS is antisemitic.” “The boycotts do more harm than good.” “Boycotts won’t bring peace.” “Israeli businesses provide jobs for both sides.”
<i>neutral</i>	Discussion of Israel-related boycott activity which does not take a pro or anti-boycott stance but simply discusses factual, non-opinionated information.	“Israel has lost [amount] of revenue due to boycotts.” “Calls for boycotts of Israel have increased/declined.”
<i>noclass</i>	Posts that do not discuss the Israel-Palestine conflict as a topic, or they discuss the Israel-Palestine conflict, but the posts does not relate to boycott activity.	“Free Palestine.” “Israel has a right to exist.” “Russia should be sanctioned, products boycotted.”
